# The BIGGEST and the SMALLEST

Here we are again!. JASO will be present at BAUMA, the World's leading construction machinery exhibition. For JASO Tower Cranes, BAUMA has always been more than just an international trade show. Each exhibition is unique and the best platform to showcase our latest developments and solutions in lifting.

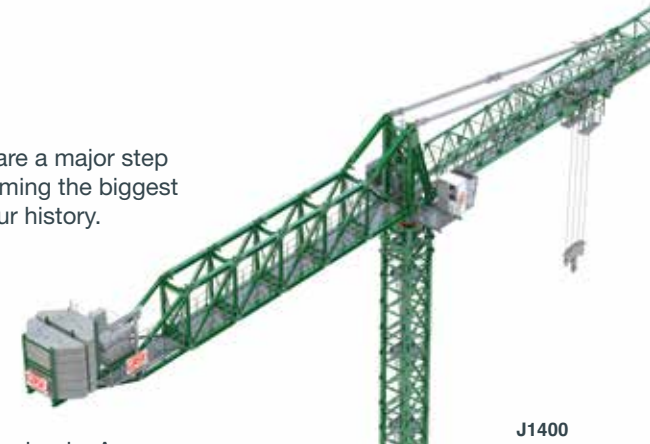

2019 is the year we are not only releasing the biggest cranes we ever manufactured, but also the smallest.

## Changing with the Times

As the tower cranes industry evolves we change with the times and adapt to new requirements, producing next-generation solutions to enable us to provide the best service in the most demanding projects worldwide.

## The BIGGEST...

Our new J780PA and J1400 models are a major step in our forward-looking strategy, becoming the biggest tower cranes ever manufactured in our history.

J1400

### J1400 TOP LINE H SERIES

The best option for the toughest heavy loads. A characteristic short tower top, variable modular counter jib options and optimized transport dimensions.

J1400 TOP LINE H SERIES		
Max. reach	Max. load	Tip load
80 m	64 t	10,500 kg

### J780PA LUFFING PA SERIES

JASO's largest ever luffing crane. Designed to bring the best and latest available in lifting heavy loads in small spaces.

J780PA LUFFING PA SERIES		
Max. reach	Max. load	Tip load
70 m	75 t	5,700 kg

J780PA

## ...and the SMALLEST

We introduce our first JASO scale model **J560** designed for collectors and JASO fans.

JL25

The most versatile tower crane operator lift, for safe and quick access to the cabin.
